tantrism in the book i find pictures of a woman spinning in a circle finally
there is a reason for the dance that i ve been hiding in all of my life
according to the book i am a goddess but the book is too difficult to understand
the science is too complex to understand the journey i must read every book
in the library that s millions of books adding to my misery are the voices
and the visions jesus and the virgin are flesh and blood in my world
and devil fighting rituals are a way of life

exhausting my resources i search for help no one wants to listen i am encouraged to be quiet not to let my craziness surface that doesn't work for me because the journey is real

the essence of my book i lost my mind and got it back with time my mind is a complex thing only i know what it is like within concealed in my skull it's anything but dull i tried to keep it sane but it has its own brain i lost control and got it back but it's that trust i lack not knowing what comes next i converted my thoughts to text to try and understand before i'm buried in the sand i kind of know how you tick but to society i am sick labelled as mentally ill but i have a strong will to conquer my brain and learn how to maintain a level of sanity enough to have clarity and function within the norm without causing a storm i lost you twice as i rolled the dice gambling with my mind because i didn't know what kind of illness i was dealing with now i know schizophrenia it is i try to make my peace with a mind that is never at ease now i wrote this book and that much suffering it took to describe my mind but i think now it is perfectly timed to share this book with all the pain and sweat it took i hope to spark a conversation that puts us on track to that far destination where acceptance is key and we can all live free by ym mehanni

schizophrenia remains the most complex puzzling and because of its tendency
towards chronicity the most severe of the mental disorders it is a very
heterogeneous disorder characterized by extreme disruptions of thought per
ception behavior and emotion about i of the population worldwide will
experience at least one schizophrenic episode most of the patients will have a
number of exacerbations leading in about 30 of cases to a chronic residual
state due either to the illness itself or to psychosocial environmental factors or
most likely to the interaction of both given the enormous personal hardship for
patients and their relatives as well as the staggering costs of the illness for our
societies research in schizo phrenia has become the number one priority in
many countries especially in the united states however research on the etiology
of schizophrenia has failed to establish a single causal factor and it is
nowadays accepted to be multifactorial a combjnation of biological
